

DoyinTech

Smart Digital Solutions

DoyinTech designs and deploys robust, scalable, and secure technology solutions that solve real-world business problems — with a focus on performance, reliability, and long-term maintainability.

DoyinTech

Executive Summary

DoyinTech is a Nigerian technology company specializing in frontend and backend engineering, scalable system architecture, API development, cross-platform mobile applications, and practical AI automation.

Founded and led by Silas Doyin Jonathan, a Senior Software Engineer, the company builds secure, high-performance digital solutions for startups, enterprises, and growing organizations across Nigeria and Africa.

Our work spans Laravel and PHP systems, Node.js APIs, Next.js web platforms, Flutter mobile apps, database design (MySQL & PostgreSQL), and AI-assisted workflows that remove repetitive operational work.

We prioritize clean architecture, production-grade delivery, and systems that remain maintainable long after launch — so clients can scale with confidence.

Registered Business

DOYIN'S TECHNOLOGY

CAC No: 9380561

TIN: 2623175378501

Jos, Plateau State, Nigeria

Mission

To design and deploy robust, scalable, and secure technology solutions that solve real-world business problems while maintaining performance, reliability, and long-term maintainability.

Vision

To become a leading African technology engineering firm recognized for frontend and backend excellence, system optimization, and enterprise-grade software development.

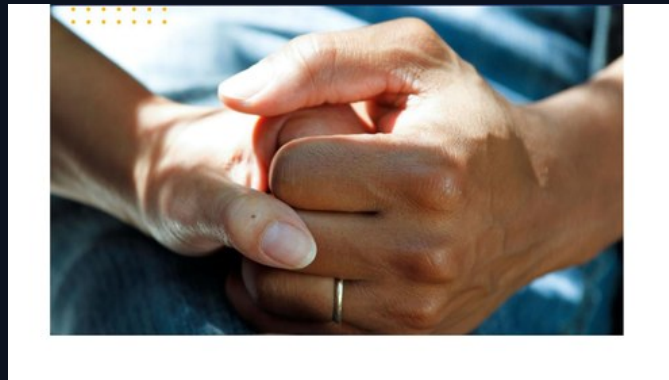

Core Principles

- **Clean Architecture**
Systems designed for scale and maintainability
- **Security First**
Secure APIs, authentication, and data handling by default
- **Business-Driven**
Technology that serves real operational needs
- **Production Quality**
Code and infrastructure ready for real users

Why Choose Us

- Clean architecture & scalable systems
- Performance-focused frontend & backend engineering
- Secure API-first development
- Business-driven technology solutions
- Enterprise-grade database optimization (MySQL, PostgreSQL)
- End-to-end system design (Backend + Mobile + Infrastructure)
- Laravel, PHP, Node.js, Flutter & Next.js expertise
- Practical AI automation for business processes

Our Services

Backend Engineering

Laravel, PHP, Node.js, secure APIs, databases

Web Platforms

Next.js, React, high-performance business websites

Mobile Development

Flutter apps for Android & iOS

System Architecture

Scalable design, infrastructure & optimization

AI Automation

Practical workflows that remove repetitive work

Selected Work

Imperial Villa Property Platform

Corporate website, client portal & staff management system for property & pension facilitation.

DoyinMart

African software marketplace for digital products and tools with local pricing.

LegacyPlay

Premium PlayStation gaming lounge website with booking & tournament features.

JennyGlams

Elegant portfolio & booking site for a professional makeup artistry brand.

Arqademy CBT

Computer-based testing platform for education and student assessment.

Business Registration

Registered Name: DOYIN'S TECHNOLOGY

CAC Business Name Registration No: 9380561

Tax Identification Number (TIN): 2623175378501

Nature of Business: Technology & Software

Principal Place of Business: Jos, Plateau State, Nigeria
